September 3, 2009:

**REMARKS**

An Examiner's Interview Summary Record (PTO-413) was mailed September 16, 2009.

During the interview, the following was discussed:

1. Brief description of exhibits or demonstration: None
2. Identification of claims discussed: 1
3. Identification of art discussed: Galis, Helgren and Carter
4. Identification of principal proposed amendments: The Examiner suggested amending claim 1 to positively recite the function of determining the technology. suggested amending the claims to clarify if the service is created or implemented and which rules are associated with the creation and implementation.

5. Brief Identification of principal arguments: The combination of the cited references do not teach or suggest "the technology rules model expert know-how and specify how to determine technology to use in the service being created based on stored attributes of equipment in the network and stored attributes of the service."

6. Indication of other pertinent matters discussed: None
